

Microlabequipment-Automatic Paste Filling Machine 4 Head, 6 Head manufacturer in india (MI-APFMH46)

This automatic piston filler by MICRO is ideal for filling liquid, paste in jars bottle, from 30 ml to 1000 ml ,. The piston filler provides a highly accurate volumetric fill in that the same amount of product enters and exits the piston cylinder each fill cycle. Automatic piston filling machines will use a power conveyor and one of several indexing systems - from pin to starwheel or screw indexing - to align bottles under the fill heads.

Description :

This automatic piston filler by MICRO is ideal for filling liquid, paste in jars bottle, from 30 ml to 1000 ml ,. The piston filler provides a highly accurate volumetric fill in that the same amount of product enters and exits the piston cylinder each fill cycle. Automatic piston filling machines will use a power conveyor and one of several indexing systems - from pin to starwheel or screw indexing - to align bottles under the fill heads. Automatic liquid fillers will also use an operator friendly touchscreen interface for settings such as fill times, indexing times and other fill cycle components. Piston fillers can be manufactured as automatic inline filling machines or as tabletop filling systems. The piston filling machine also has the ability to handle products of all

<u>Specifications :</u>	Voltage	415V AC
	Phase	Three Phase
	Air Supply	4 to 6 Kg/Cm2 (pneumatic operated stopper)
	Frequency	50 Hz
	Bottle Size	15mm to 70mm
	Output Speed	30 to 120 Bottles/Minute
	Filling Volume	30 to 1000 ML
	Number of Head	4 / 6/ 8 / 10 / 12 Nos.
	Fill Size	30 ml to 1000 ml
	Height of Conveyor	850 +/- 50 mm Adjustable
	Net Weight	Approx 600 kg
